HITTING CARBON WHERE IT HURTS!

HAND PROTECTION WITH A CONSCIENCE

THE WORLD'S FIRST CARBON NEUTRAL SAFETY GLOVE RANGE!

ZERO
FOOTPRINT

At Traffi, we're on a mission to reduce your hand injuries, costs, waste and carbon emissions.

Choosing the LXI range from Traffi means that you are selecting a high-quality product that is certified carbon neutral. This covers raw material, knitting, manufacturing, shipping to North America and on to the customer delivery point.

ZERO PLASTIC PACKAGING

As part of our sustainability journey, we are on a mission to remove all plastic. So far we've replaced over 500,000 poly bags with our 100% recyclable card wrap!.

TG1240

TG1240 offers great protection, due to having Nitrile built in. We issued two pairs to every person, and the fact that these can be washed while still on, left to dry and then used again, makes them perfect.

Martin Caddick,
Head of Support Services, Bradfords

TG3240

These gloves are a lot better than regular gloves, comfortable to wear and feel soft on hands, grip and durability is better as well.

Comfortable gloves with good grip and protection.

Charlie Dunn,
Space Engineering Services

TG5360

The gloves are great, really thin, and you still can use the work tablets with them on which helps for taking photos on the job. The dexterity is great as well and really helps you can wash them to get longer use out of them.

Excellent fit and feel, even after washing them. Far superior to other gloves.

Mark Petkovic,
Team Leader,
Network Rail

HERE'S WHAT THEY SAY...

OXTED VIADUCT

THE PROBLEM

BAM Nuttall had to comply with the minimum standards of cut A3 protection as requested by their client. However, they were finding the cut A3 gloves very cumbersome and restrictive, making general handling activities challenging. It was also identified that there was a trend of workers removing gloves to use devices as the current products provided weren't touchscreen compatible.

THE SOLUTION

Traffi recommended the TG6240 due to the high cut resistance, dexterity, hard wearing coating and touchscreen capabilities. After trials had been carried out, it was clear that the TG6240 was the preferred glove of choice lasting double the time of the previous products, and the overall performance of the product being rated as excellent. With sustainability at the heart of BAM Nuttall, Traffi were able to support in their goal to reduce CO₂ and waste emissions with an LXT carbon neutral glove.
